1. INTRODUCTION

a. Project Overview

With the quick advancement of technology, we now have networks and fast connections that allow us to communicate with people right away. Daily use of mobile devices, tablets, and laptops is rising, with the majority. Most people already have access to these amenities. We must keep up with all happenings and news in our quick and information-driven environment. Users of this Android news app can access the most recent news from 120+ newspapers in 50+ countries. This application's major goal is to connect news stories from all around the world and provide them to users as quickly as possible in the best visual manner.

b. Purpose

The purpose of this application is to provide a smooth news reading experience to the users of this application. Moreover, it is useful to a variety of users with all the age groups.

2. LITERATURE SURVEY

a. Existing Problem

With the usage of the application on a day-to-day basis, the application needs to be taken care of without crashing.

b. References

1. News Crew Tracker:

News Crew Tracker is a geo-location and assignment management tool developed and reviewed by journalists and photographers to solve the problem of not knowing where staffs are located and what they're currently working on.

2. Flipboard:

Flipboard is based around the idea of creating a digital magazine curated by the user. It borders on RSS reader, but it's definitely more of a news app, so it made the cut. The user can be as broad or specific as the user like with Flipboard, point it toward a general topic like technology or productivity, or specify one site in particular that you want to keep up with, and Flipboard mixes everything together seamlessly.

3. Android News App:

The main focus of this application is to connect news articles from all around the world and deliver it to user as fast as possible in best visualize way. This News app is an android mobile application where user have access to latest news from 120+ newspapers from 50+ countries.

4. TECHNOMANIA :

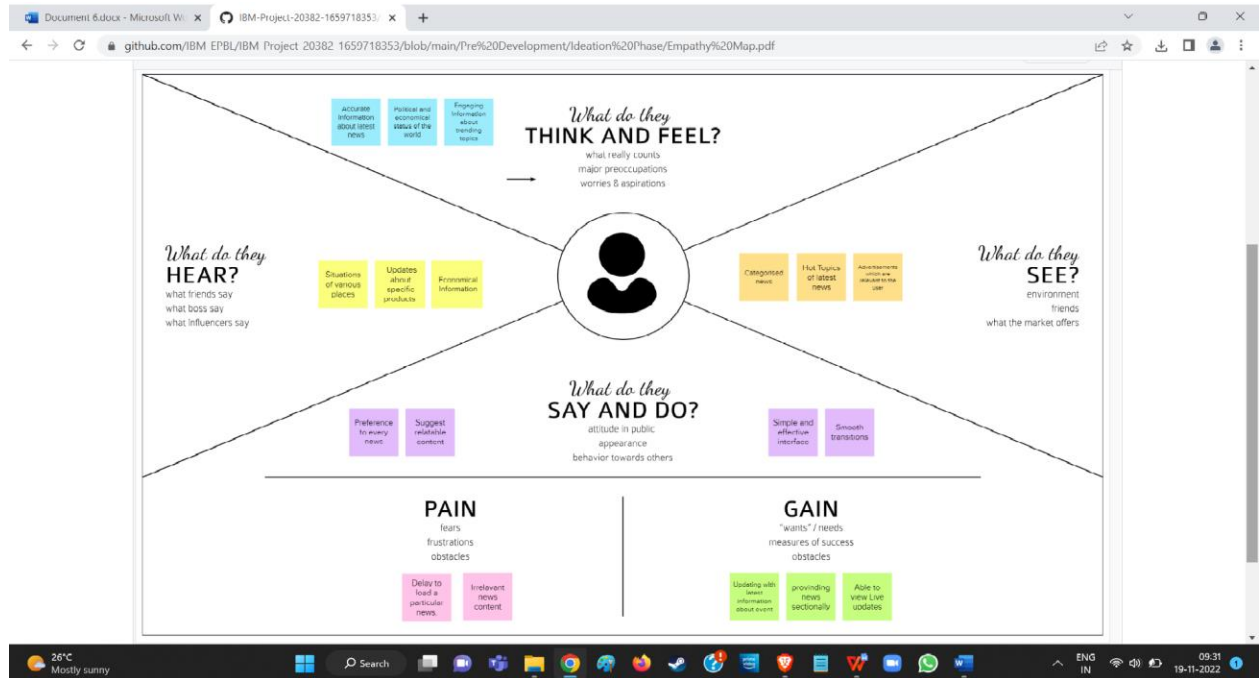

Project is to provide people a handy android application through which people can access all types of news and information. Through this application, any user can gain technical knowledge of the world and its surrounding with just one click ahead. User does not have to visit multiple sites for different related information. All information is going to be in one place.

c. Problem Statement Definition

Why did we choose this option out of all the ones offered to us? We, as a team, believed that the sector has a sizable audience that we could take advantage of. And melodramatically speaking, we thought about all the issues customers in this area were having as seldom users of the news app. We believed that although the majority of people use news applications, this area may still be underutilized.

3. IDEATION & PROPOSED SOLUTION

a. Empathy Map

b. Ideation & Brainstorming

Brainstorm & Idea Prioritization

The document preview shows a series of diagrams and text blocks. The first diagram is a mind map similar to the one in the previous image. The second diagram is a flowchart showing a process flow. The third diagram is a grid with various colored cells and text. The fourth diagram is a line graph showing a trend over time.

c. Proposed solution

S.No.	Parameter	Description
1.	Problem Statement (Problem to be solved)	<p>The Random update of various and different news events without any categorization.</p> <p>Finding the specific or particular news about anything among the random ads and span pop ups.</p>
2.	Idea / Solution description	<p>Compact preview of news.</p> <p>Search news with speech recognition. Reduced Buffer time to load the news.</p> <p>Prioritize the main news. Irrelevant news will not be shown.</p>
3.	Novelty / Uniqueness	<p>Only the news from the user's area of interest will be shown.</p> <p>The main news is prioritized based on others review.</p> <p>Various details can be collected from the specific news.</p>
4.	Social Impact / Customer Satisfaction	<p>Money can be saved from buying news paper everyday and most probably it can be accessed from different locations.</p>
5.	Business Model (Revenue Model)	<p>Alignment of the adds at a separate section, with this a revenue can be obtained.</p> <p>Providing membership and reducing</p>

d. Problem Solution Fit

Project Title: News Tracking Application

Project Design Phase-I - Solution Fit

Team ID: PNT2022TMID27406

Define CS, fit into CC	1.CUSTOMER SEGMENT(S) CS People above the age of 10.	6.CUSTOMER CONSTRAINTS CC Budget, network connection, availability of storage, spending power	1. AVAILABLE SOLUTIONS AS People tried storing newspapers in storage rooms segregated by year, incidents, etc. But the thing was it occupied large storage areas and it was difficult to keep track of all kinds of news. Later came the usage of scanning process.	Explore AS, differentiate
	2.JOBS-BE-DONE / PROBLEMS J&P Proper database methodologies needs to be followed for storage purpose.	9.PROBLEM ROOT CAUSE RC Customers doesn't have access to old information but with the help of this application they will be able to obtain it.	7.BEHAVIOUR BE Find right storage devices, calculate usage per day.	
Identify strong TR & EM	3.TRIGGERS TR Seeing their friends or family members using this application or through you tube advertisements.	10.YOUR SOLUTION SL With the help of databases we deliver an application that is very convenient for users to search for desired topics.	8.CHANNELS of BEHAVIOUR CH 8.1 ONLINE The customers search for the desired news in various websites. 8.2 OFFLINE The customers search for the desired news through old newspaper.	Identify strong TR & EM
	4.EMOTIONS : BEFORE / AFTER EM Lost, insecure > confident, in control & design.			

4. REQUIREMENT ANALYSIS

a. Functional Requirement

FR No.	Functional Requirement (Epic)	Sub Requirement (Story / Sub-Task)
FR-1	User Registration	Registration through Form
FR-2	User Confirmation	Confirmation via Email
FR-3	User Login	Login Via Email ID & Password
FR-4	Home Page	Shows the NEWS Headlines.
FR-5	Tracker Page	Shows the NEWS elaboratively when the NEWS Headline of the home page is clicked

b. Non-Functional Requirements

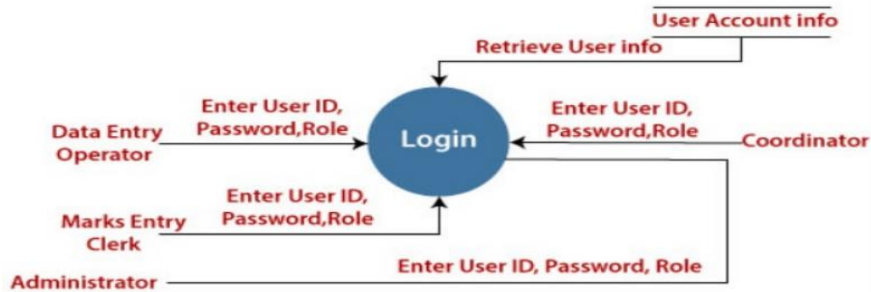

FR No.	Non-functional requirement	Description
NFR-1	Usability	Our website is used to Read News and gain Knowledge according to user's interest.
NFR-2	Security	User can only login with their own Email ID and password without their Email and password no one can use the App.
NFR-3	Reliability	Our website delivers the reliable content only from NEWS API.
NFR-4	Performance	It is a high performable App with friendly User Interface and shares lot of information without any Issues.
NFR-5	Availability	Our Website is supported with all search Engine so it will Avail forUser at any time.
NFR-6	Scalability	This Website is built with high data storage capacity,processing power and networking can all be scaled using cloud computing. Infrastructure.scaling can be done quickly and easily.

5. PROJECT DESIGN

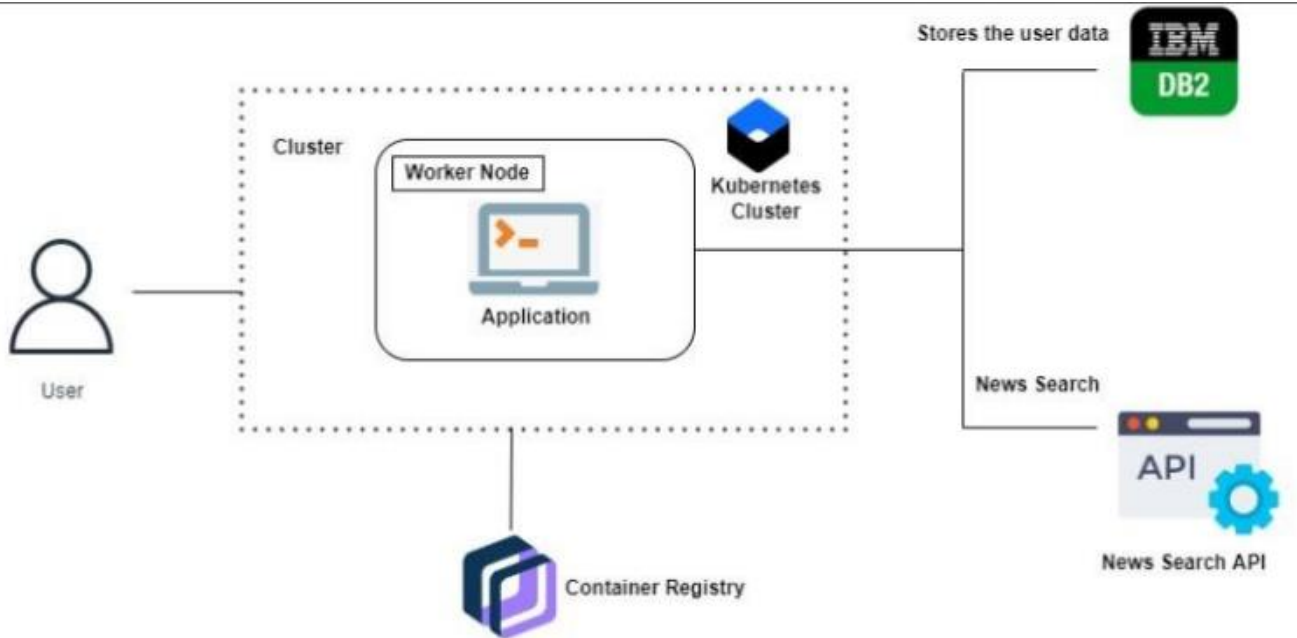

a. Data Flow Diagram

2. Login

The level 2 DFD of this process is given below:

b. Solution & Technology Architecture

c. User Stories

User Type	Functional Requirement (Epic)	User Story Number	User Story / Task	Acceptance criteria	Priority	Release
Customer (Mobile user)	Registration	USN-1	As a user, I can register for the application by entering my email, password, and confirming my password.	I can access my account / dashboard	High	Sprint-1

		USN-2	As a user, I will receive confirmation email once I have registered for the application	I can receive confirmation email & click confirm	High	Sprint-1
		USN-3	As a user, I can register for the application through Facebook	I can register & access the dashboard with Facebook Login	Low	Sprint-2
		USN-4	As a user, I can register for the application through Gmail		Medium	Sprint-1
	Login	USN-5	As a user, I can log into the application by entering email & password		High	Sprint-1
	Dashboard					
Customer (Web user)						
Customer Care Executive						
Administrator						

6. PROJECT PLANNING & SCHEDULING

a. Sprint planning & Estimation

TITLE	DESCRIPTION	DATE
Literature Survey & Information Gathering	Literature survey on the selected project & gathering information by referring the, technical papers, research publications etc.	24 SEPTEMBER 2022
Prepare Empathy Map	Prepare Empathy Map Canvas to capture the user Pains & Gains, Prepare list of problem statements	25 SEPTEMBER 2022
Ideation	List the by organizing the brainstorming session and prioritize the top 3 ideas based on the feasibility & importance.	27 SEPTEMBER 2022
Proposed Solution	Prepare the proposed solution document, which includes the novelty, feasibility of idea, business model, social impact, scalability of solution, etc.	27 SEPTEMBER 2022
Problem Solution Fit	Prepare problem - solution fit document.	30 SEPTEMBER 2022
Customer Journey	Prepare the customer journey maps to understand the user interactions & experiences with the application (entry to exit).	18 OCTOBER 2022

Functional Requirement	Prepare the functional requirement document.	18 OCTOBER 2022
Technology Architecture	Prepare the technology architecture diagram.	18 OCTOBER 2022
Data Flow Diagrams	Draw the data flow diagrams and submit for review.	19 OCTOBER 2022
Prepare Milestone & Activity List	Prepare the milestones & activity list of the project.	26 OCTOBER 2022
Project Development - Delivery of Sprint-1, 2, 3 & 4	Develop & submit the developed code by testing it.	26 OCTOBER 2022

b. Sprint Delivery Schedule

Sprint	Functional Requirement (Epic)	User Story Number	User Story / Task	Story Points	Priority	Team Members
Sprint-1	Registration	USN-1	As a user, I can register for the application by entering my email, password, and confirming my password.	2	High	Gokul Prasad
Sprint-1		USN-2	As a user, I will receive confirmation email once I have registered for the application	1	High	Rishi Babu

Sprint-1		USN-3	As a user, I can register for the application through Facebook	2	Low	Mithwin Immanuel Stanley
Sprint-1		USN-4	As a user, I can register for the application through Gmail	2	Medium	Venkatesh R
Sprint-1	Login	USN-5	As a user, I can log into the application by entering email & password	1	High	Rishi Babu, Mithwin
Sprint-2	Dashboard	USN-6	As a user I should be able to navigate and access all the features hassle free	2	High	Rishi Babu, Venkatesh R
Sprint-2	Layout	USN-7	As a user I should be able to access the portal with different devices with the same comfort	2	High	Gokulprasad, Mithwin
Sprint-3	Data Store and retrieval	USN-8	Get Data from API and store as JSON in DB2	3	High	Mithwin, Rishi Babu
Sprint-3		USN-9	Get bin data from API and store in DFS	2	High	Gokul, Rishi
Sprint-4	User Segregation and data access	USN-10	As a CC executive I should be able to uniquely identify the customer and offer help	1	Low	Venkatesh, Mithwin
Sprint	Functional Requirement (Epic)	User Story Number	User Story / Task	Story Points	Priority	Team Members
Sprint-4	Change code	USN-11	As a administrator I should be able to modify code according to the future requirements.	2	Medium	Gokul, Rishi
Sprint-4	Monitor the system	USN-12	As a administrator I should be able to monitor the cloud system and fix errors before customer.	1	High	Venkatesh, Mithwin

```

8. TESTING

9. RESULTS

10. ADVANTAGES AND DISADVANTAGES

- a. Advantages
 - Own Your Channels
 - Better User Experience

Higher Engagement

Push Notifications

Revenue Opportunities

App Store Presence

b. Disadvantages

1. Require data/Wi-Fi to get online
2. Companies not making as much money due to free reading for audiences
3. News spreads quicker online - people find out news before they should
4. Lose money - can't get people to pay for digital
5. Older audiences may not access digital platforms
6. Costly to maintain
7. Errors stay online FOREVER

11. CONCLUSION

This is fast evolving world with modernization taking a toll on the world, people nowadays prefer to spend time more on the gadgets rather than reading newspaper.

News site is an web application which makes news paper reading much interesting and easier.

The easily usable API and other softwares makes this application very user friendly and most of all save time.

12. FUTURE SCOPE

Implement automated location functionality. This means that as a user moves from one city to another, the local news will change offline browsing can be improved to complete articles more efficiently. This version of app is in the seeding stage and there is a lot of room for future enhancements. Features that can be added for later versions are as follows:

1. Save video
2. Watch this later.

13. APPENDIX
